

Intercom Volume Control Knob:

⚠ WARNING

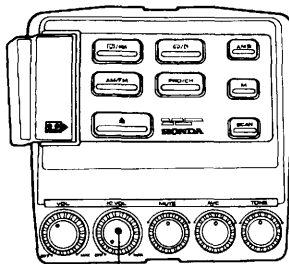

- ***Some local governments prohibit the operator from using a headset; always obey applicable laws and regulations.***

To communicate with the passenger using the intercom, turn this knob clockwise.

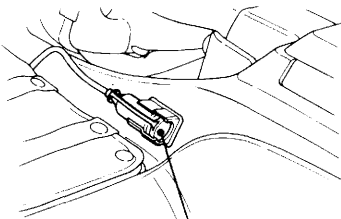

Turning this knob further increases intercom volume. When not using the intercom system, turn off this knob.

NOTE:

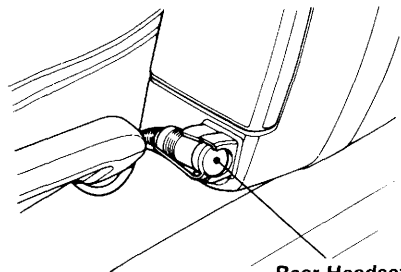

- The auto volume control does not function for the intercom system
- Turn this knob only high enough for adequate volume; if turned too high, there may be "feed back" from the fairing speakers.
