

- **4.** Inspect the electrodes and center porcelain for deposits, erosion or carbon fouling.
 - If the erosion or deposit is heavy, replace the plug.
- Make sure that a 1.0 mm wire-type feeler gauge cannot be inserted between the spark plug gap. If the gauge fits in the gap, replace the plug with a new one.

- **6.** Make sure the plug washer is in good condition.
- Install the spark plug. With the plug washer attached, thread the spark plug in by hand to prevent cross-threading.
