

Place the fan over the motor shaft.

Apply a locking agent to the fan motor shaft threads, install and torque the plain washer, lock washer and nut.

Attach the fan shroud to the radiator with the four bolts.

## INSTALLATION

Install the radiator onto the frame and tighten the mounting bolts.

Connect the upper and lower hoses to the radiator and tighten the hose bands.

Connect the thermostatic switch and fan motor wire couplers to the wire harness.

Install the radiator cover.

Fill the cooling system (page 6-3).
